

INFORMA Eco-Friendly Stand Catalog 2026

Reusable, Not Disposable

WHY CHOOSE A REUSABLE BOOTH?

About 80% of a traditional booth's structure is typically made of single-use materials that can't be reused or recycled, creating an environmental problem.

Benefits

- 87% reduction in CO2 emissions
- Lower cost
- Easy assembly and disassembly
- High-quality, durable booth

BOOTH

CoverUp structure guarantees the reuse of structures for at least 100 cycles. At the end of the process, 100% of the materials used are reused.

CARPET

Use of eco-friendly carpet that, once used, is sent to a recycling facility; carbon offset credits are applied for each meter of carpet used.

REDUCE + REUSE + RECOVER

Net Zero Carbon Events

Sustainability principles are now firmly embedded in industry practices and customer expectations. Informa Markets is a founding member of the “Net Zero Carbon Events” initiative.
